Guido De Angelis (M'07–SM'11) was born in Perugia, Italy, in 1966. He received the “Laurea” degree in electronic engineering from University of Perugia in 1993. This author became a Member (M) of IEEE in 2007 (Intelligent Transportation System, Communication System, Signal Processing, Instrumentation and Measurement System), and a Senior Member (SM) in 2011. He has also received a Ph. D. in Information Engineering (Telecommunications) in 2011 from the University of Perugia, with a thesis on the study and integration of ground-based and satellite-based positioning systems. His final dissertation focused on the study and integration of ground-based and satellite-based positioning systems. He has been serving as a Reviewer for several technical

journals and international conferences.

In 2009, he spent 3 months as visiting student at the “Plan Group- Geomatics Department”, University of Calgary, Alberta (Canada), under the guidance of Prof. G. Lachapelle, working on the integration between GNSS and cellular network positioning.

Guido De Angelis also works at Regione Umbria (Regional Government of Umbria, Italy), Office for Innovation Promotion and Enterprise Innovation Services, where he is in charge of the "ICT for SMEs" technical activities. He manages and has the responsibility of technical aspects regarding the introduction of ICT in SMEs, with the use of Structural Funds of EU inside the region (Regione Umbria). He has been serving as a Reviewer for several technical journals and international conferences. He has authored or co-authored of papers on the GNSS, cellular network positioning, estimation theory in journal and conference papers.
